Art Unit: 2879

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application, by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the mailing address of each inventor. A mailing address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The mailing address should include the ZIP Code designation. The mailing address may be provided in an application data sheet or a supplemental oath or declaration. See 37 CFR 1.63(c) and 37 CFR 1.76.

The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 602.

It does not identify the foreign application for patent or inventor's certificate on which priority is claimed pursuant to 37 CFR 1.55, and any foreign application having a filing date before that of the application on which priority is claimed, by specifying the application number, country, day, month and year of its filing.

2. The following is an examiner's statement of reasons for allowance: prior art of the record does not disclose applicant's claimed discharge lamp electrode assembly, including:

an electrode upholding part by which an electrode is supported, the electrode having, an opening at its one end, wherein the opening having a first concave portion and a second concave portion, the first concave portion having a smaller diameter and second concave portion and being located inwardly

Art Unit: 2879

of the first diameter, the second concave portion adjoining the first concave portion and being located at the end with the opening,

a substantially cylindrical metallic buffer part, which is provided in the second concave portion and has an inner peripheral surface which runs parallel to a longitudinal axis of the electrode,

wherein an end portion of the upholding part is cylindrical and adjoins a tapering part, wherein the cylindrical end portion of the upholding part of the electrode is located within the first concave portion of the electrode, and

wherein the upholding part is fitted into the opening and supports the electrode such that the tapering part of the upholding part of the electrode is held in an interference fit in the buffer component.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2879

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Harada et al, Kikuchi et al, Kunada et al and Ehrlichmann et al each are cited for showing a general structure of an electrode assembly.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ashok Patel whose telephone number is 571-272-2456. The examiner can normally be reached on Monday-Thursday.
